Office Action Summary	Application No. 10/510,231	Applicant(s) LEBERFINGER ET AL.	
	Examiner Merrick Dixon	Art Unit 1774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1774

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Gugumus(US 6828364 B2).

The cited reference teaches the claimed invention- col 48; lines 40-48; col 52, lines 60-64.

3. Claims 8 and 17-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Gugumus(US 6828364 B2).

The cited reference teaches the manipulative step of injection molding similar material as claimed. Concerning claims 17-20, it is submitted limitations directed to articles are not germane to the instant question for process patentability. Such article limitations must affect the process in a manipulative sense-Ex parte Pfeiffer, 1962 CD 408(1961).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7,9-14 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gugumus(US 6828364 B2) in view of Prissok et al(US 6203915 B1). The primary reference to Gugumus teaches the claimed hinge composite element comprising wood material and thermoplastic polyurethane- col 48, col 40-48; col 52,

lines 60-64; col 52, lines 60-64.. The primary reference fails to expressly teach it polyurethane material made from specific reacting material. The secondary reference to Prissok et al, however, teaches that it is notoriously well known in the art to form same polyurethane material from hexamethylene diisocyanate col 1, line 55- col 2, line 30). It would have been obvious to one of ordinary skill in the art to produce the polyurethane of the primary with the specific claimed reactant material, as claimed, motivated by the desire to impart flexibility to same- col 1, lines 20-25. Concerning claims 9-14 and 21, the primary reference teaches wood material in col 53, lines 15-16. , the primary reference teaches furniture material/product in col 53, line 2 and door articles .

6. Applicant's arguments filed 1-24-06 have been fully considered but they are not persuasive. Applicants argue that the resulting hinge of the instant application is more durable than conventional hinges. To this the examiner respectfully remind applicants that the office is in no position to determine experimentally in an invention such as that at issue, the subject matter known is the same as that known in the prior art.

Accordingly, in such instances, this shifts the burden to applicants who have the resources to make a clear distinction and better experimentally define and identify the differences between the teachings of the references and the claimed invention.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1774

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
